

## **Mitch Clark**

**Founder of TOMCAT Global, Inc.**

Managing a civic center in the early 80's, Mitch was responsible for bringing performances and talent into Midland, Texas. Having a difficult time finding outdoor staging products for concerts, he soon capitalized on the need for trussing products in the USA and began manufacturing TOMCAT truss out of his garage in 1987. What started with just four employees grew to 4 manufacturing plants around the world: Liverpool, London, Guadalajara and Midland. Mitch was the visionary behind the company's rapid growth and TOMCAT soon became the leading manufacturer of staging, lighting and support systems in the entertainment, audiovisual, and exhibition industries. His personal involvement in projects large and small earned the company its reputation for "making it happen". In 2006, Mitch sold the TOMCAT Global family of companies to a London based publicly traded company. Since then, he has invested in several ventures which have led him to CenterStaging, LLC.
